Subject: SAN DIEGO TEA PARTY 1990
<http://www.schottie.de/?p=2881>

TELL ME IS IT POLLUTION

IF I TAKE A HAND FULL OF TEA

AND THROW IT INTO THE OCEAN

IS THAT HARMFUL FOR YOU AND FOR ME ?

(Crowd, loud:)

SAN DIEGO BAY – SAN DIEGO BAY –
I AM HERE TO SAY : “DON’T TAX MY LIFE AWAY”

THE LEADERS ARE THERE FOR THE PEOPLE

THE PEOPLE ? - THATS YOU AND THATS ME !

AND BECAUSE THEY ALWAYS FORGET THIS

WE NEED LOTS OF COFFEE AND TEA

(Chorus:)

SAN DIEGO BAY – SAN DIEGO BAY –
I AM HERE TO SAY : “DON’T TAX MY LIFE AWAY”

THEY HAD A PARTY IN BOSTON

IN SEVENTEEN – SEVENTY – THREE

TEA WAS THROWN IN THE OCEAN

AND OUT CAME THE LAND OF THE FREE

(Sorry for my bad german-english..
... I just immigrated with a Green Card)

(Singer, funny, loud) :

"OO-OO-OO-OO-OOOOH"

(Crowd:)

SAN DIEGO BAY – SAN DIEGO BAY –
I AM HERE TO SAY : “DON’T TAX MY LIFE AWAY”

THE NATIONAL DEBT IS GROWING

LAWYERS ARE RUNNING THE SCENE

READ MY LIPS – I AM LYING
(Bezog sich damals irgendwie auf einen Satz von Bush senior)

IS THAT THE AMERICAN DREAM ?

SHAME ON YOU , BRC :

Description of Duties :

A draft report shall be submitted within 18 months of the date of the Presidential memorandum directing establishment of this Commission; a final report shall be submitted within 24 months of the date of that memorandum. The reports shall include: Consideration of a wide range of technological and policy alternatives, and should analyze the scientific, environmental, budgetary, financial, and management issues....

This is what the People of the United States expect from the BRC.

NOW I ASK YOU IN PUBLIC,

so that everybody could hear it, read it and think about it:

Have YOU, Lee Hamilton, YOU, John Kotek, YOU, Tim Frazier, YOU Mary Woollen and YOU, the members of the Disposal subcommittee

- payed from the US taxpayers with millions of dollars -

worked , discussed, evaluated, studied and improved

- as I did on my risk, month by month, Mail by Mail -

this great idea ?

I have heard NOT ONE SINGLE ARGUMENT and NOT ONE SINGLE QUESTION from you.

SHAME ON YOU, BRC !

....BUT A NICE STORY FOR THE PRESS :

Betreff: I ask you for one hour of your full attention for this press information
MILLIONENJAHRESICHER , weltweit neu und technisch machbar
ist die Endlagerung jedes einzelnen radioaktiven Atoms und jedes einzelnen Atommüll-Fasses aus
Asse, Gorleben, Yucca Mountain oder sonstwo

TIEF IM ERDMAGMA.

Dear Mr. President Barack Obama:

As directed by your Memorandum for the Secretary of Energy dated January 29, 2010 you will get soon from the Blue Ribbon Commission on America's Nuclear Future - www.brc.gov – this recommendation:

“The United States should proceed expeditiously to develop one or more permanent deep geological facilities for the safe disposal of high-level nuclear waste. Permanent disposal is needed under all reasonably foreseeable scenarios. Geologic disposal in a mined repository is the most promising and technically accepted option available for safely isolating high-level nuclear wastes for very long periods of time...”

... if you ignore the earthquake risk

... if you ignore the groundwater risk

... if you ignore that in case of a volcanic eruption this radioactive waste could enter biosphere.

... if you ignore the same foreseeable national and international political stress as in Gorleben and Yucca Mountain

You, Mr. President and The People of the United States should not follow BRC's SECOND BEST advise.

My idea to dispose Nation's nuclear waste NOT some km deep in a “mined repository”
BUT some hundred km deep in the earth magma is feasible and SAFE FOR MILLIONS OF YEARS.

contact/more info/comments through <http://www.schottie.de/?p=1736>

Please support this press campaign

Please forward this EMail to all journalists you know

http://en.wikipedia.org/wiki/Continental_drift

<http://de.wikipedia.org/wiki/Kontinentaldrift>

There where you are right now the continental drift has a max speed of 10 cm/year
= 100 kilometers in 1 million years.

Vice versa:

If a barrel of radioactive waste is buried 100 km deep in the earth magma it needs about 1 mio
years to reach the lower side of the earth's crust.

It is not utopic to bury USA's and world's millions of barrels rad-waste 100 km deep in the earth
magma.

To do this challenging job it is "only" necessary to reach the
http://en.wikipedia.org/wiki/Mohorovi%C4%8Di%C4%87_discontinuity

Because a density-8-barrel rad-waste sinks under its own weight in the density-3-magma down
towards geocenter like a stone in water.

There are many options where and how to reach the Moho.

Please study my about 50 EMail published by www.brc.gov click library click comments March 2010,
June, July, ...Dec, Jan 2011, ...June 2011.

Please act and contact me

With best regards
Rainer Schottlaender, Dipl.-Phys.

You can find on www.brc.gov a DRAFT DISPOSAL REPORT

On page 22 : OTHER DISPOSAL CONCEPTS.

I agree with BRC's arguments in these 4 points.

I also agree that Finlands mined repository is a good solution for some ten years.

I hope some of the some hundred recipients of this Email will ask BRC, Lee Hamilton, Tim Frazier,
John Kotek and Mary Woollen, Secretary Dr. Steven Chu and DOE :

Why you do not mention with one single word

Schottlaender's idea/workplan to dispose Nation's nuclear waste

NOT some km deep in a "mined repository"

BUT some hundred km deep in the earth magma ?

My thrilling research started Nov 2, 2008, when I found this video ...

[The Keyhole-Experiment](#)

Publiziert 22. Februar 2011 | auf www.schottie.de

Watch this video: <http://www.youtube.com/watch?v=ySnI4RYirKw>

You see world's only lava lake. Stable since decades. Take two minutes of your time. And admire this wonder of nature. Which you have never seen before. Deep in the desert of Ethiopia...
